Operations 360° Virtual Tours

CHENNAI
Network
Video Transcript

Welcome to the virtual tour of our Intelligent Operations Center in Chennai.

This short video can be paused at any point if you want to look around for longer. If you are watching this on your laptop, you can navigate the 360-degree experience using your cursor or touchscreen. You may also use a virtual reality headset for a fully immersive experience.

Ready?
Let's go!

Welcome to Chennai!

The cultural capital and gateway city of South India, Chennai is renowned for its education system and one of the highest literacy rates in India. The city is also a keeper of South Indian artistic, religious, and culinary tradition.

Our Chennai Intelligent Operations Center is one of our 50+ centers around the world dedicated to enabling your journey to intelligent operations, and one of 13+ centers that specialize in driving exceptional innovation needed to build a Network function that's ready for the future.

This facility, like all our other locations, is fully ISO® 14001 Environmental Management System-Certified. From smart meters to renewable energy, we continue to assess and minimize how we impact our environment.

Our diverse teams of industry, functional and domain experts work together in a collaborative and innovative space at this facility.

This includes professionals focused on network functions including Network Engineering & Optimization, Service Fulfillment and Service Assurance services.

It is here where we would work with you to deliver network business process services, using design thinking and our proprietary frameworks and technology--ultimately evolving your network function to be insights driven and agile.

At the heart of our approach for accelerating the journey to digital, data-driven, intelligent operations is our SynOps platform.

SynOps orchestrates the optimal combination of human + machine talent, driven by data and insights, to create an evolved, intelligent operating model, to deliver target business outcomes.

The SynOps dashboard help us continuously monitor the performance of people and technologies. Ultimately, giving us the control to get ahead of issues before they become critical.

Exceptional talent.
Innovative technology.
Powerful Insights

SynOps is powering intelligent operations.
