

Operations 360° Virtual Tours

CHENGDU

Talent & HR Operations
Video Transcript

Welcome to the virtual tour of our Intelligent Operations Centers in Chengdu.

This short video can be paused at any point if you want to look around for longer. If you are watching this on your laptop, you can navigate the 360-degree experience using your cursor or touchscreen. You may also use a virtual reality headset for a fully immersive experience.

Ready?
Let's go!

Welcome to Chengdu!

Chengdu is one of the most important economic, financial, commercial, cultural, transportation, and communication centers in Western China.

Our Chengdu Intelligent Operations Center is one of our 50+ centers around the globe dedicated to enabling your journey to intelligent operations, and one of 20+ centers that specialize in driving exceptional innovation needed to build a Talent & HR function that's ready for the future.

This facility, like all of our other locations, is fully ISO® 14001 Environmental Management System-Certified. From smart meters to renewable energy, we continue to assess and minimize how we impact our environment.

Our diverse team of industry, functional and domain experts work together in a collaborative and innovative space at this facility.

This includes professionals focused on Talent & HR functions including Talent Acquisition, Talent Development, and a full range of Employee & HR Services.

It is here where we would work with you to deliver Talent & HR business process services, using design thinking and our proprietary frameworks and technology-ultimately evolving your Talent & HR function to be leading class, future ready, agile, and more efficient.

At the heart of our approach for accelerating the journey to digital, data-driven, intelligent operations is our SynOps platform.

SynOps orchestrates the optimal combination of human + machine talent, driven by data and insights, to create an evolved, intelligent operating model, to deliver target business outcomes.

The SynOps dashboard helps us continuously monitor the performance of people and technologies. Ultimately, giving us the control to get ahead of issues before they become critical.

Exceptional talent.
Innovative technology.
Powerful Insights

SynOps is powering intelligent operations.
