

Accenture myNav: Take SAP applications to the cloud with speed, security and precision

Video Transcript

It's natural to strive for new heights
To aim to rise above the rest.
Unless you look skyward
You miss opportunities
And risk getting left behind.
Cloud raises the game
Enabling resilient and sustainable operations
Helping you ascend and excel.

And if you're running SAP applications,
By migrating to the cloud with confidence
You'll gain agility, opportunity, and
sustainability.
So it's no longer about whether you should
move
But how.
Here's the answer.

Accenture myNav has the capabilities you
need, so as you raise your game,
You'll know when to move, why and how.

Video Transcript

myNav defines the business case and strategy and pinpoints your best platform and architecture,
With automation helping you move SAP workloads to the cloud with speed and precision.

Reducing implementation costs
And making the architecture reliable and secure.

Constant monitoring and automation ensure high productivity, so your processes in the cloud work for you.
With myNav and automation
You can watch your costs go down
And your productivity rise and soar.

With less need for human intervention
You can free up human ingenuity
Coupled with real-time data and connectivity to your ecosystem
To discover new insights and unrivalled experiences
Soon, you'll begin to accelerate and innovate
On your journey in the cloud.
Let's move SAP applications to the cloud.
With confidence. **Now. Safe. Fast.**
