

SC&O PEOPLE OF CHANGE VIDEO SERIES: ESPERANZA PUIGSERVER

VIDEO TRANSCRIPT

Hi, I am Esperanza Puigserver. I live in Barcelona, Spain. And I joined Accenture in 2015. And now I am an analytics manager for the Supply Chain practice.

Before joining Accenture, I had a studied aerospace engineer and I worked in flight simulation and for an airline company.

I knew that Accenture had the Center of Excellence dedicated to Supply Chain in Barcelona. And inside that team, there were people who specialized in analytics and data science. So I thought that was a great opportunity for my professional career.

The second day I joined the company, I had to travel abroad, and I had an assignment in an aerospace and defense OEM. So I could leverage the knowledge that I had about the aerospace industry and start this career path within analytics and data science.

But then I wanted to keep growing professionally. So I moved to other industries.

We are a global team. What I think that this gives to us, is a broader vision of how we can answer to different questions, how we can think out of the box with the objective to be more innovative and come up with the best solution for our clients Because of the people.

In terms of Supply Chain, Accenture is always at the forefront of the latest trends, challenges and solutions that are available in the market. And we even work in patents.

Accenture has given me the opportunity to grow a lot from being an analyst doing more data science, hands on work, to being a manager. And I'm always grateful for that.
