

# Audit Report

Portugal, Coimbra — 2025

# Foreword

We have analyzed the mobile network performance of the mobile networks of MEO, Vodafone and NOS in Coimbra, a riverfront city in central Portugal.

# Measurement Overview

umlaut tested and measured the performance of its voice and data services on smartphones in comparison to other 5G/LTE mobile radio networks in Coimbra, Portugal. The audit was done as a performance benchmark performed by umlaut between 03.02.2025 and 04.02.2025. Dedicated measurements have been executed as drive tests outdoors using a Samsung Galaxy S23+. All data measurements have been performed in 5G preferred mode. Voice measurements have been done in 5G/5G preferred mode on both sides, while call origin has been alternated.

In addition crowdsourced performance data has been collected and evaluated between CW35 2024 and CW06 2025 for Coimbra, Portugal. The following pages provide a comparative overview about the performance results observed for the different tested service types.
