

A person in a red jacket stands on a rocky peak, looking out over a vast landscape at sunset. The sky is filled with soft, golden light and scattered clouds. In the foreground, a dark, jagged rock formation is visible. A digital grid of purple and blue lines is overlaid on the scene, particularly concentrated in the lower half of the image. The text "Risk is everywhere" is centered in white, bold font across the middle of the image.

Risk is everywhere

83%

of Accenture Risk Study: 2024 Edition respondents say **complex, interconnected risks** are **emerging** at a more rapid pace.

81%

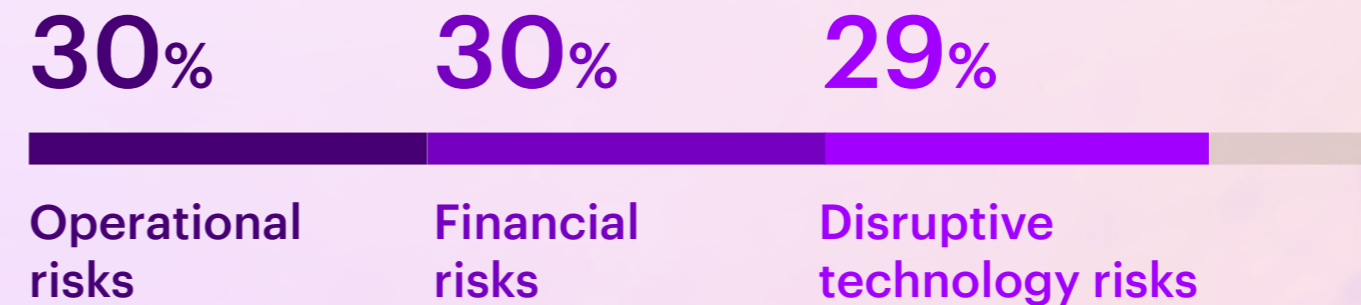

of study respondents say **risks in other sectors** are now **impacting** their **business**.

77%

of respondents say **risks** are **more difficult to detect and manage** than ever before.

Top rising risks

According to Risk Study respondents, the top rising risks are:

These risk types are on the rise when compared to 2021. Our analysis also shows that the top rising risks are impacting each other.

Risk functions are still playing catch-up

77%

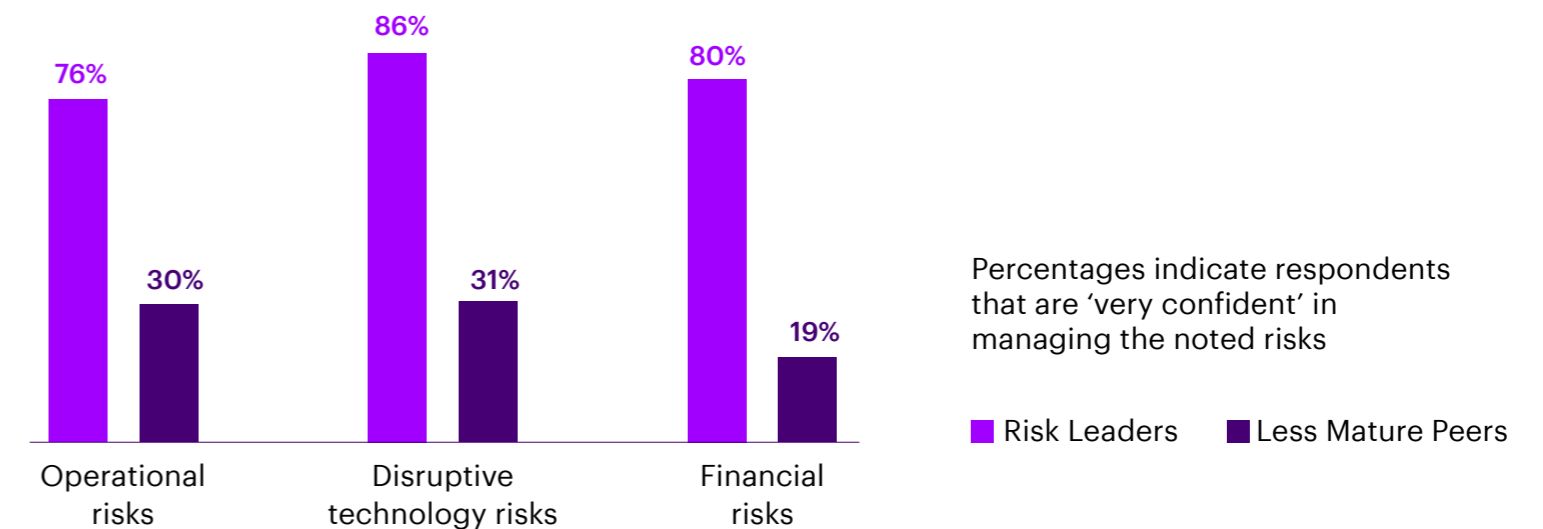

of study respondents say the risk function is struggling to support the wider business in developing risk capabilities and a risk mindset.

72%

of study respondents say their risk management capabilities and processes have not kept pace with the rapidly changing risk landscape.

Risk leaders are blazing a path forward

Our Accenture Risk Study: 2024 Edition research has identified a group of respondents (14%) that demonstrate leading risk characteristics and capabilities. These risk leaders are not only better able to detect and mitigate key risks than their peers with less mature risk capabilities, but their organization is more likely to be growing in both size and scale.

Risk leaders are also more likely to take actions that strengthen their risk capabilities and are far more satisfied with those actions. This positions them to better manage interconnected risks and navigate reinvention.
