

JOHNSON CONTROLS OPENBLUE

VIDEO TRANSCRIPT

John: Johnson Controls and Accenture have been working together to reinvent the way we experience our spaces.

Vineet: Our market leading platform Open Blue is on a groundbreaking journey guiding a new era of building management.

John: We have seen Open Blue evolve from simple point applications to a robust edge to cloud platform.

Vineet: It is amazing and it's not just about technology. It is about creating more sustainable and resilient buildings to enhance occupant comfort, operational efficiency, and energy performance.

John: With a human centered approach, and AI at the core, Open Blue is here and

Vineet: now. Yes, it is, and it enables predictive maintenance, enhances productivity, all the while ensuring data privacy and security. It's really fascinating how simplified user experiences can expand the value of data-driven solutions.

John: Open Blue is set to push the boundaries of what's possible. This is the digital transformation that is shaping the future of buildings. Tune in for my full conversation with Vineet.
