ACCENTURE AUDIT AND COMPLIANCE TOOL
VIDEO TRANSCRIPT

BRINGING CONSISTENCY AND QUALITY TO HUMAN CAPITAL MANAGEMENT DATA

Every day HR departments work with sensitive personal data that needs to be up-to-date and consistent to help ensure the company meets its regulatory and legal requirements.

At the same time hundreds of rules govern how this data is verified, and managers must cope with those too. Business growth and success depend on consistent transparent business practices in every part of an organization. It's a lot to manage and maintaining high quality data is hard work.

We found a way to help HR teams become more efficient and still ensure highly sensitive personal data is accurate and complete with a clear audit trail showing changes made.

Comprehensive and easy to use, the Accenture HR Audit and Compliance Tool standardizes and simplifies data controls allowing you to maintain data quality and reduce the risk and cost of data management.

Let's talk about the benefits. To begin with our customizable rules library speeds up the implementation of business controls and a dashboard application gives management a visual summary of errors and resolutions.

By showing audit results in a consolidated workbench, you can review and address data quality issues quickly and efficiently. Audit periods give you flexibility allowing you to perform business controls independently from payroll periods. Inconsistencies are evaluated allowing you to quickly check object descriptions for reliable organizational management data.

Finally, the tool also helps ensure transparent travel information. Organizations can verify this information, check receipts and implement exception rules for validating cost categories and other data.

The Accenture HR Audit and Compliance Tool is fully integrated with current SAP ERP Human Capital Management systems. It's applicable internationally and complements an organization's existing IT landscape.

Join our growing list of over 1,700 satisfied customers in more than 40 countries. We're an early mover in SAP HANA cloud platform solutions. Interested in finding out more about the Accenture HR Audit and Compliance Tool? Talk to Accenture Software for Human Capital Management.
