Transform your business with Oracle on Google Cloud

Optimize performance. Scale faster. Innovate with confidence.
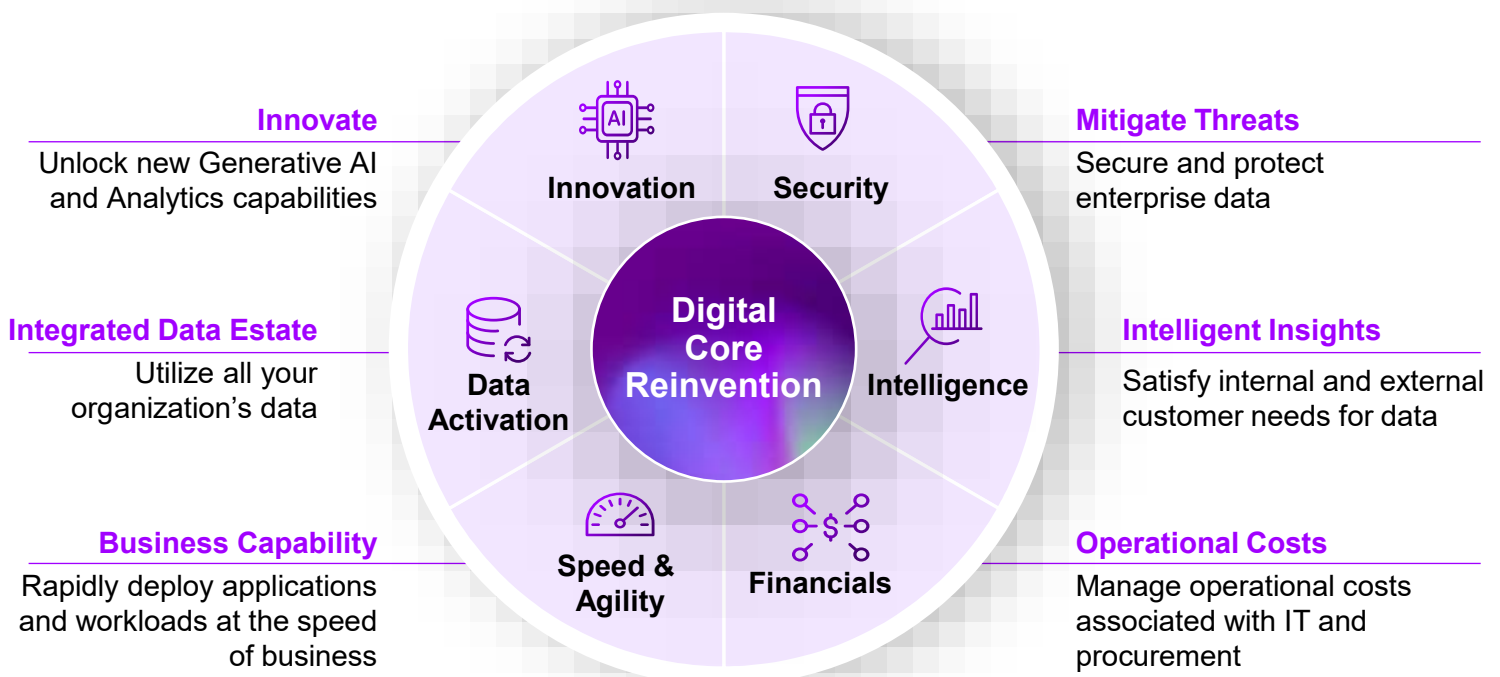

Cross-Cloud Interconnect | Oracle on Compute Engine, GKE, VMware Engine | Oracle Database@Google Cloud

Do you face these barriers to growth?

→ Burdened by legacy applications & data platforms

→ Difficulty scaling applications to meet growing demand

→ High infrastructure and licensing costs draining IT budgets

→ Limited agility to innovate or integrate with modern cloud services

→ New GenAI or Agentic Features backlog

Envision a modern architecture for your Oracle estate...

Innovate
Unlock new Generative AI and Analytics capabilities

Integrated Data Estate
Utilize all your organization's data

Business Capability
Rapidly deploy applications and workloads at the speed of business

Mitigate Threats
Secure and protect enterprise data

Intelligent Insights
Satisfy internal and external customer needs for data

Operational Costs
Manage operational costs associated with IT and procurement

Innovation **Security** **Digital Core Reinvention** **Intelligence** **Data Activation** **Speed & Agility** **Financials**

What can Oracle on Google Cloud do for you?

Achieve Cloud Agility	Activate Your Data At Scale With Exadata	Streamline Application Migration	Oracle Database Consolidation & Modernization	Bring your AI to Life
Maximize your investments in Oracle technology with the benefits of Cloud innovation, resiliency and security.	Maintain the performance and scalability of Exadata without sacrificing your Enterprise Cloud Strategy on Google Cloud.	Save on the time, costs, complexity, and risks of re-platforming.	Explore options to Consolidate to Oracle Exadata platform and transform to Autonomous Database.	Create intelligence integrating your Oracle data with Google Cloud AI and applications.

Accenture by the numbers

26X consecutive Google Partner Award Winner (2011-2025)

200+ Oracle Recognitions

34K Cloud Projects

#1 In Google AI Services & First Partner to get Data Center Transformation Specialization

36,000+ Google Cloud trained Professionals, **5,000+** Data Scientists

68+ locations delivering Cloud and Innovation services

What we offer?

Foundation Services	Database Migration	Data Activation	Workload Optimization	Managed Services
• Establish a secure infrastructure for applications & data	• POC, pilot, or initial mover database migration.	• Utilize advanced Generative AI or analytics workloads	• Improve and automate application operations with Cloud-native capabilities	• Manage and run applications and databases
• Enable Oracle Database at Google Cloud or OCI connectivity	• Utilize best-in-class tools and **Accenture's innovation** to seamlessly migrate and modernize Oracle databases on Google Cloud.	• Unlock the value of your data by integrating with workloads running on Google Cloud	• Migrate and modernize Oracle-dependent applications	• Deploy a migration factory for application and data workloads
• Optimize data estate with automated database discovery, Oracle license optimization and migration planning	• Data Center Exit	• Transformation with Google Cloud leveraging Oracle Data and Applications	• Consolidate application footprint and reduce hosting costs
