TRANSFORMING HEALTHCARE WITH ACCENTURE AND ORACLE

VIDEO TRANSCRIPT

Health industry leaders are embracing change and transforming the business of healthcare by putting people at the center of **everything they do.**

The potential exists to turn this **human-centric approach** into a reality…

and to emphasize the care in **healthcare**.

With solution innovations from **Accenture and Oracle**, healthcare providers, payers and public health organizations can work together across the ecosystem to meet people where they are on their health journey.

Accenture and Oracle are collaborating on the development of **integrated, end-to-end solutions** from the **back-to-front office**

We are enabling a new era in healthcare delivery

By improving health outcomes and reducing the cost of care through data-driven insights—with a comprehensive view of patients' health records…

By advancing back-office and revenue cycle automation, reducing operational costs and enhancing patient experiences—

And by addressing the most demanding regulatory requirements and strengthening national health infrastructures on a sovereign cloud foundation.

Spanning more than three decades, Accenture's relationship with Oracle is built on a powerful framework for joint solution innovation and delivery.

Leveraging **Accenture's deep experience in digital healthcare transformation, functional business knowledge and technical skills** in applying **Oracle technology innovation**, we can help humanize your healthcare business.
